

# Sustainable resins

We manufacture rosin and turpentine extracted from gum resin of our pine forests. The resins are indicated to manufacture paint, varnish, adhesive, polish, perfume, amongst other products.

## Gun Resin

**APPEARANCE**  
yellow color solid

**COMPOSITION**  
abietic acid (main component)

**APPLICATIONS**  
printer inks, paper glue, emulsifiers, adhesives, erasers, cosmetics, soaps, detergents and food industries such as bubble gum.

## Turpentine

**APPEARANCE**  
Transparent liquid

**COMPOSITION**  
Aromatic cyclic

**APPLICATIONS**  
Terpinyl acetate, isobornyl
